

ATH-A2000Z

high-fidelity closed-back headphones

Next-generation Art Monitor headphones with exquisite purity of sound. Featuring pure-titanium housings and redesigned drivers for clear, natural high-resolution audio reproduction.

- Hand-assembled in Japan, the **A2000Z** features newly designed 53mm drivers harnessing Audio-Technica's legendary transducer technology for superior high-resolution audio performance.
- Pure-titanium housings with elegant polished metallic finish.
- Innovative 3D wing support for increased comfort over long-listening periods.
- Double Air Damping System structure provides an extended frequency range for deep bass reproduction.
- Ergonomically designed earpads offer superior sound isolation, resulting in extended bass.
- A dual-sided, four-core cable with independent ground wires for left and right channels, designed for the highest-quality sound.
- Lightweight yet rigid magnesium baffle decreases unwanted vibration.

ATH-A2000Z
