Rotel 06 Series Take a look. Imagine that it looked a bit more extravagant. You know: LEDs to light up the room. Knobs, buttons and sockets in abundance. If we gave the 06 Series looks like that on top of its sublime sound, you would have to pay maybe four times as much for it. The thing is, we don’t think you should pay exceptional sums for exceptional sound. And thanks to our policy of spending every penny maximising the performance of our separates, it just means there isn’t much left for unnecessary design flourishes. We think it’s all about the music. Take a listen and judge for yourself. www.rotel.com

Rotel RA-05 integrated amplifier. You will have noticed that a pattern has developed over the past 25 years or so. When Rotel launches a new amp, the buttons and knobs tend to stay in the same place. It’s what is inside that changes. We continuously evaluate and select components that offer the best possible performance, such as UK-designed metal film resistors. We keep refining circuit board layouts and signal paths to maintain the purity of the signal. We even manufacture our own power supplies, which generate our uniquely vital sound. We may even add an additional feature or two. And every time, it’s a better amp. www.roteleurope.com
